

AUTUMN WOOD at Hunter's Field

Homeowners Association

Architectural Review Committee Standard ADDRESS NUMERALS (HOUSE NUMBERS)

Adopted: April 20, 2017

In addition to SVMC Municipal Code Title 8, Chapter 21, Paragraph 15, this ARC Standard supplements and clarifies CC&R Article VII, Section 7.8, *Maintenance of Lots*.

Each Residence (house, dwelling) is assigned a location address that will be prominently displayed on the structure in a neat, orderly fashion, unobstructed by foliage, clearly visible from the street fronting the Lot, with numerals not to exceed six (6) inches in height.

A mounting plate may be used, which generally may not exceed 18 inches in the long direction and proportionally one-third (1/3) of that dimension in the short direction, and which may be oriented either horizontally or vertically.

A homeowner may request an exception in accordance with Architectural policy.
